

# VIVA Royal Jelly

## Supplement

Royal jelly has long used to promote good health.

So what is royal jelly? A substance with complex origin. Royal jelly comes from bees. The life span of a queen bee is roughly five years, in which time it generates up to 3,000 eggs every day. Unfertilized eggs turn into male bees. Fertilized eggs become queen bees and worker bees. Worker bees are the gatherers of honey that they ingest, digest with a special enzyme and then secrete to the queen bees. Royal jelly enables the queen bees to generate more eggs.

Fresh royal jelly is milky yellow in color and fairly sweet in taste. The stronger the taste, the fresher the substance. To maintain freshness, royal jelly must be kept cold. When it turns bad, it takes on a deep brown color.

VIVA Royal Jelly contains no water or preservatives.

Get your hand on this health-enhancing product and experience the benefit for yourself!

### Qualities

1. Concentrated royal jelly.
2. No preservatives, artificial coloring and flavoring.

### Directions:

Take 1 capsule daily before meals as a dietary supplement.
